

## Question from TJU

What is the specific need for public transportation access at 9 and 11?

Is # 9 garage connected to skiing trails integrated with the shooting range?

Considering the underpass, can they both be used as the entrance/exit point for vehicles going in and out, or only # 11 serves as the entrance?

You can design the underground car park however you want! Our idea was to drive into the garage via the tunnel, including buses. The exit was planned opposite the entrance so that the buses wouldn't have to turn around in the garage, cause of space reasons. The garage doesn't have to be connected to the cross-country tracks. There isn't a biathlon shooting range anyway.

2、9和11对于公共交通通行的具体需求是什么？考虑到地下通道，是否可以作为车辆进出地下的出入口使用？

1. What is the specific need for public transportation access at 9 and 11?  
Considering the underpass, can it be used as an entrance/exit point for vehicles going in and out of the underground?
