There are several exhibits arranged at stations along the route. At Semmering there is an indoor exhibition of the construction process and a model, and outdoor exhibits as well as a memorial to Carl Ritter von Ghega.

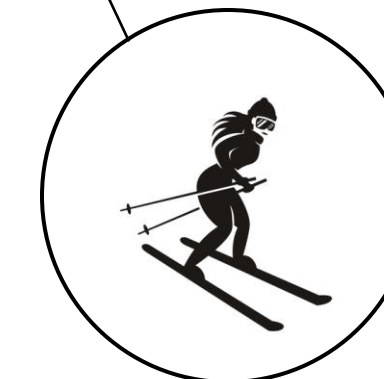

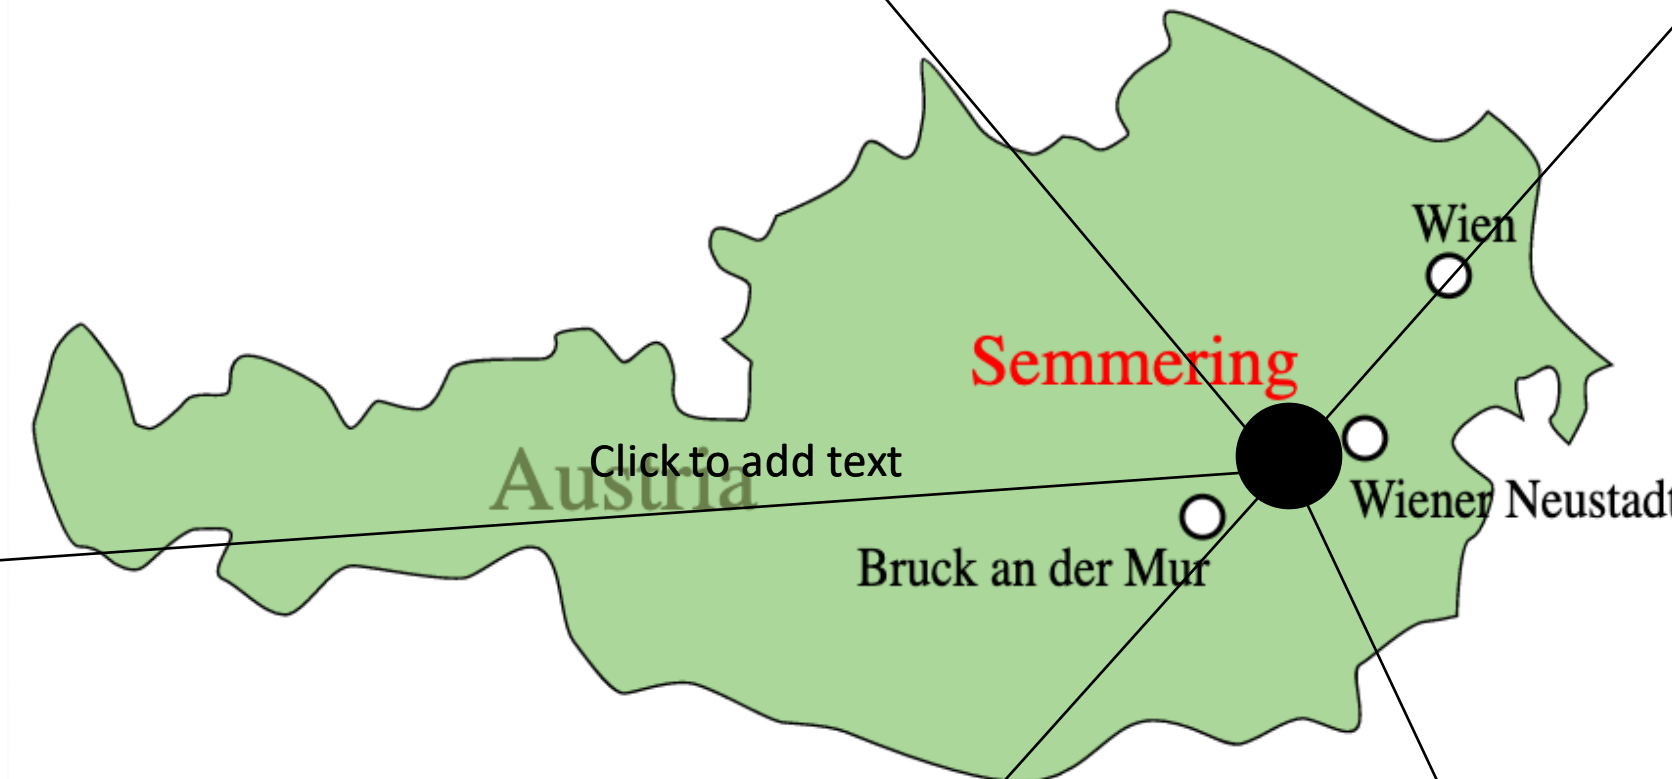

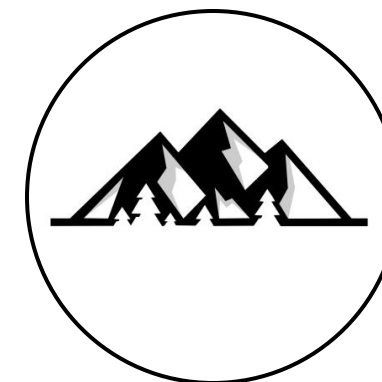

Moreover, with the construction of the Semmering Railway, “areas of great natural beauty became more easily accessible and as a result these were developed for residential and recreational use, creating a new form of cultural landscape”

On December 2, 1998, the UNESCO World Heritage Committee inscribed the Semmering Railway as the world’s first railway on the world heritage list. The justification for inscription of the “Ghega Railway” read “the Semmering Railway represents an outstanding technological solution to a major physical problem in the construction of early railways

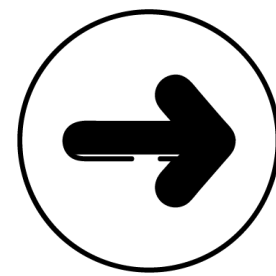

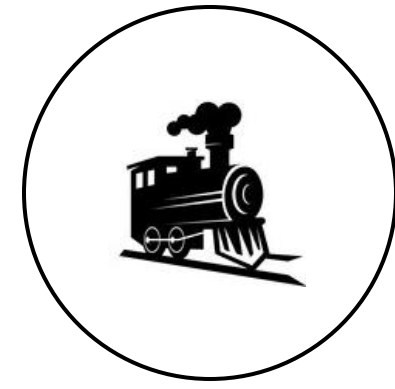

In Vinodukt Payerbach, a wine bar in the Schwarztal viaduct, visitors experience a multimedia show, and can taste wines from the areas along the southern railway line

It is famous for its skiing, and has hosted the Alpine skiing World Cup several times. When the famous Semmering Railway was completed in 1854, it brought many tourists from Vienna.
